Spacecoast Technical Network

Rebuilding Our Community, One Person at a Time

STN Newsletter
Issue 11
December 5, 2012

**Martin McClellan Appointed
New Speaker Coordinator**

Spacecoast Technical Network Moves Forward With All Volunteer Staff

Since the beginning of this grassroots organization, people have donated their time in the interest of helping others restore their income stream, and rebuilding a community hard hit by the closing of the NASA Space Shuttle Program combined with a national recession.

Even though many of its members are unemployed, with no solid future in sight, they take time to volunteer in many capacities to keep the organization moving forward and growing.

In the latest move, Martin McClellan has accepted the position of Speaker Coordinator.

The position carries great importance in the success of the weekly networking meetings.

Friday's Speaker

Carol A. Scott

Carol A. Scott is currently Deputy for the Launch and Recover System Office within the Commercial Crew Program. The Commercial Crew Program office is managing the development of industry-designed crew transport systems to take NASA crew members to the International Space Station by mid decade.

Scott joined NASA in 1987 as a main propulsion/space shuttle main engine systems engineer. She held various positions in progression to become MPS/SSME integration lead. She was the system lead for Columbia, during the STS-35 hydrogen leak investigation. In 2000, she became the orbiter project engineer for Discovery, leading the test team through several launches, Kennedy's first orbiter modification period, and initial post-Columbia return-to-flight phase. In 2005, she became the Kennedy shuttle program integration manager, responsible for the Kennedy Shuttle System Engineering and Integration and Integrated Logistics offices. In October 2005, she became one of the founding managers for the new Constellation Ground Operations Project office, responsible for launch vehicle requirement definition and execution. Previously, she was the deputy mission manager for the Constellation Program's first test flight vehicle, Ares I-X, at NASA's Kennedy Space Center.
